

Doctorly Healthcare

Website & Application

UI/UX Case Study

60+ Screen

Duration 4 Weeks

Various Tools Used

Project Overview

Doctorly is a software Website / application that enables patients to easily book appointments with doctors online. The Website / app is designed to provide a **smooth** and **efficient experience** for both patients and healthcare providers. Doctorly features a user-friendly interface that allows patients to view doctors' profiles, check availability, read reviews, and schedule appointments at their convenience. It also includes reminders and secure communication to enhance the overall healthcare experience.

Project Goal

The goal of Doctorly is to make healthcare access simpler and more convenient through digital innovation. The application aims to connect patients and doctors efficiently by providing easy appointment booking, organized schedules, and real-time updates. Doctorly seeks to improve patient satisfaction while helping healthcare professionals manage their time and appointments more effectively.

Problems

- **Long Wait Times:** Patients Often Wait For Weeks Or Even Months To Get An Appointment With A Specialist, Causing Delays In Receiving Necessary Medical Treatment.
- **Difficulty In Scheduling Appointments:** Many Patients Face Challenges Scheduling Appointments Due To Lack Of Knowledge About The Healthcare System Or Complicated Booking Processes.
- **Limited Access To Specialists:** Some Patients Live In Areas With Few Available Specialists, Making It Hard For Them To Access The Care They Need.
- **Limited Hours Of Operation:** Traditional Hospitals May Have Restricted Working Hours, Preventing Patients From Booking Appointments At Flexible Times.
- **Overcrowding:** Hospitals Can Become Overbooked, Leading To Long Waiting Times, Delayed Treatments, And Patient Frustration.
- **Emergencies:** Some Hospitals Are Overwhelmed With Emergencies And May Not Be Able To Take Appointments.

Solutions

- Will Save Patients Time.
- Provide Easy Way To Schedule Appointment.
- Provides Access To Many Specialists.
- Provides 24hours Appointment Options.
- Easy To Book Appointment.
- Provides Ambulance In Emergency Case.

User Centered Design Process

The User-Centered Design Process Is A Structured Series Of Steps Used To Create Products, Services, Or Experiences That Focus On The Needs Of Users. It Typically Includes Research, Ideation, Prototyping, Testing, And Implementation. This Process Is Iterative, Meaning Designers Continually Refine And Improve The Solution Based On User Feedback And Testing Results.

The Main Goal Of The Design Process Is To Develop A Solution That Is Useful, Usable, And Desirable For Users, While Also Being Feasible For Stakeholders. Depending On The Project's Scope And Requirements, The Process Can Be Simple Or More Complex, But It Always Keeps The User's Needs At The Core Of Every Decision.

Competitive Analysis

Stackholder Interview

What's your role in the healthcare organization?

What's your medical service or practice about?

Who is your strongest competitor and why?

What makes your medical service unique (USP)?

What factors define success for this website?

What features do you want patients to access?

Do you have any tech or compliance constraints?

Do you need integrations (EMR, booking, telehealth)?

What's your budget for the project?

What's your deadline?

Do you have a brand style guide?

Who is your target patient audience?

Market Research

Project Competitors

1- Vezeeta

2- Altibbi

3- Chefaa

4- CliniDO

5- DaliliMedical

6- Doctork

7- Tebcan

Competitive Analysis

Competitor	Core Services	Strength Points	Weak Points	Opportunities	Threats
<u>Vezeeta</u>	Doctor booking, telehealth, pharmacy delivery, lab tests, home visits	Strong brand, largest coverage, verified reviews, insurance integration	Sometimes doctor no-shows, price sensitivity, high competition	Expand rural coverage, deeper insurance, telehealth upgrades	Trust issues if cancellations, regulatory hurdles
<u>Chefaa</u>	Online pharmacy & medicine delivery	Strong in pharma logistics, quick delivery, niche focus	No doctor booking or telehealth, limited breadth	Partner with doctors/hospitals, expand coverage	Competition from Vezeeta's pharmacy service, logistics cost
<u>CliniDo</u>	Doctor booking, telehealth, home lab tests, installment payment, AI symptom mat...	Innovative (voice search, AI), flexible payment, affordability focus	Newer, smaller network, less brand recognition	Capture cost-sensitive users, rural expansion, AI personalization	Competing with Vezeeta's scale, operational/logistics challenges
<u>Altibbi</u>	Health information, telehealth, online advice	Strong content hub, trusted health info, regional presence	Limited booking services in Egypt, weaker logistics	Content + telehealth integration, expand into full service	Content competitors, monetization challenges
<u>DalilMedical</u>	Medical directory / doctor listings	Simple discovery tool, local relevance	Limited functionality (no booking, delivery, telehealth)	Expand into booking + payments, improve UX	Overshadowed by larger competitors (Vezeeta, CliniDo)
<u>Doctorak</u>	Doctor search & booking	Easy search, local service	Narrow service scope, low awareness, limited features	Grow into telehealth + pharmacy delivery	Risk of being niche / irrelevant against stronger brands
<u>Tebcan</u>	Doctor booking in Egypt (and regionally)	Focused booking platform, cross-regional presence	Lacks breadth (pharmacy, labs), less UX innovation	Regional expansion, insurance partnerships	Intense competition, low differentiation

Survey Insights

Age?

51 responses

Have you ever used an app or website to book a doctor or online medical consultations?

51 responses

Do you prefer to use:

51 responses

Do you have a preference for the doctor's gender when booking an appointment?

51 responses

How important is each factor to you when using the app? (From 1 = Not important → 5 = Very important)

51 responses

Which of the following services do you consider most important?

51 responses

User Interview

Do you usually use an app to book medical services?

What app or website do you normally use for healthcare?

Which medical app or website do you prefer the most?

Why do you prefer this platform over others?

What problems have you faced when accessing healthcare online?

How did you react when this problem happened?

Have you tried another app or website to solve this issue?

When was the last time you used a medical app and how was your experience?

How long does it usually take you to complete a medical task (booking, finding info, etc.)?

What medical services would you like to see available in the app/website?

What do you think if we add features like online payments or insurance verification?

Do you prefer calling, chatting, or booking online and why?

- Less Time Taking
- Always Charges Too Much

Does

- Check Feedbacks
- Check Ratings
- Take Suggestions From Friends
- Ask For Recommendation

User Persona

Rawan Ebrahim

- Age 24
- Education Faculty of Agriculture
- Occupation Call Center Agent
- Location Alexandria, Egypt
- Used website Vezeeta

Bio

Rawan works long shifts at a call center, which often leaves her tired and short on personal time. Because of her irregular schedule, it's hard for her to visit clinics without waiting for hours. She prefers convenient, reliable solutions for healthcare. Vezeeta helps her quickly find available doctors, book appointments that fit her schedule, and order medications online.

Needs

- Quick and easy booking system for doctors.
- Ability to check doctors' ratings, locations, and fees.
- Home delivery for medicines.
- Teleconsultation options when she can't take time off work.
- Digital reminders for medications and appointments.

Goals

- Save time and avoid crowded clinics.
- Find trustworthy doctors with verified reviews.
- Keep her health records and prescriptions organized online.
- Have flexible appointment options that fit her changing shifts.

Strength Points

- Easy booking system without phone calls or waiting.
- Wide doctor network across specialties and locations.
- Transparent details on doctors' fees, reviews, and availability.
- Pharmacy service with home delivery.
- Telemedicine through video or voice consultations.
- Patient record management for history.
- Insurance integration in supported regions.

Weak Points

- Appointment cancellations and rescheduling issues.
- Limited doctor availability depending on location.
- Weak follow-up tools after consultations.
- Delays in pharmacy deliveries.

Dr. Mohamed Alaa

- Age 27
- Education Faculty of Dentistry
- Occupation Dentist
- Location Kafr Elshikh- Egypt
- Used website Haven't tried any

Bio

Dr. Mohamed runs a private dental clinic in a busy neighborhood. His clinic often gets overcrowded with walk-ins, which makes it hard to manage time and provide patients with the attention they deserve. He sees online platforms as a way to better organize appointments, reduce waiting room pressure, and improve patient satisfaction.

Needs

- Online booking system
- Quick access to patient history, treatments, and infections.
- Messaging or reminders to check on patients after visits.
- Clear view of appointments and histories.
- Ratings and visibility to attract new patients.

Goals

- Avoiding overcrowding in his clinic by managing bookings online.
- Save time for both patients and himself with a clear appointment system.
- Access patient health records easily, including past infections or treatments.
- maintain communication with patients for follow-ups after procedures.

Strength Points

- Ready to cooperate with online platforms
- Interested in platforms that allow easy access to patients' health history.
- Prefers to communicate online with patients for updates, recovery tips, and reminders.
- Looks for professional tools that help him keep patient data organized and secure.

Weak Points

- Too many walk-ins cause delays and stress.
- Difficult to balance treatment time and patient flow.
- Patients often forget or fail to bring their full records.
- Hard to track recovery or answer patient questions after treatment.

Problem Statement

- 1- As a Patient, I want an easy-to-use online appointment booking system so I can schedule, reschedule, or cancel visits without calling the clinic.
- 2- As a Patient, I want secure access to my medical records and lab results so I can review my history and follow-up information in one place.
- 3- As a Patient, I want clear explanations and annotated lab results so I can understand what my tests mean and what follow-up is needed.
- 4- As a Patient, I want prescription refill requests and medication reminders so I don't miss doses and can easily request renewals.
- 5- As a Patient, I want multilingual support and accessible formats (large text, screen reader-friendly) so everyone can use the site comfortably.
- 6- As a Patient, I want transparent billing, insurance integration, and flexible payment options so I understand costs and can pay conveniently.
- 7- As a Patient, I want secure messaging with healthcare providers for non-urgent questions, clarifications, and follow-up instructions.

HMW

- 1- How Might We Add A Feature That Allows Patients To Choose The Most Comfortable Viewing Mode (e.g., Light/Dark Mode) For Better Accessibility?
- 2- How Might We Help Patients Save Their Preferred Doctors, Clinics, Or Services For Quick Access Later?
- 3- How Might We Add A Feature That Allows Patients To Understand Medical Information Even If They Have Hearing Difficulties Or Need Multilingual Support?
- 4- How Might We Help Patients Track Their Health Progress, Test Results, And Follow-Up Plans More Easily?
- 5- How Might We Add A Feature That Helps Patients Afford Medical Services Through Flexible Payment Or Insurance Options?
- 6- How Might We Support Patients In Asking Questions And Getting Clear, Reliable Answers From Doctors Or Support Staff?
- 7- How Might We Make It Easier For Patients To Access Their Records, Appointments, Or Educational Materials Even When They Are Offline?
